KARAN PATEL

Toronto, ON, Canada | **647-679-2304** | **karan2399@gmail.com** | Linkedin

PROFESSIONAL SUMMARY

Angular-focused Front-End Developer with **5+ years of experience** building scalable, responsive, and high-performance web and mobile applications using **Angular, TypeScript, JavaScript, and React**. Experienced in developing reusable component architectures, integrating RESTful APIs, implementing responsive and accessible UIs, and optimizing application performance. Strong experience with **Angular, RxJS, Angular Material, TypeScript, SCSS, Node.js, and REST APIs**, with additional experience developing React and React Native applications. Proven ability to collaborate with backend, UX/UI, QA, and product teams in Agile environments to deliver production-ready features.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript (ES6+), React, HTML5, CSS3, SCSS, Angular Material, Tailwind CSS, RxJS, Ionic

Angular: Angular Components, Services, Directives, Pipes, Reactive Forms, Routing, Guards, Interceptors, Dependency Injection, RxJS, State Management, Lazy Loading, Standalone Components, REST API Integration, Angular Material

Backend & APIs: Node.js, Express.js, RESTful APIs, GraphQL, API Integration, Authentication & Authorization

Mobile: Ionic, Capacitor, Cordova, React Native, iOS & Android

Databases: PostgreSQL, MongoDB

Payments & Integrations: PayPal, Trustly, VIP Pavilion, PayNearMe, Venmo, Credit/Debit Card Integrations

Testing & Development: Unit Testing, Jest, Vitest, Debugging, Performance Optimization, TypeScript Strict Mode

Tools & Practices: Git, GitHub, Jira, Figma, VS Code, Agile/Scrum, Code Reviews, CI/CD

PROFESSIONAL EXPERIENCE

FRONT-END DEVELOPER — ANGULAR

BOYD INTERACTIVE | August 2021 – Present

- Developed and maintained **scalable Angular applications** using TypeScript, RxJS, reusable components, services, directives, pipes, reactive forms, routing, and RESTful API integrations.
- Built responsive and accessible user interfaces using **Angular 15+, Angular Material, HTML5, SCSS, and Tailwind CSS** across web and mobile platforms.
- Designed reusable Angular component patterns and shared UI components, improving development efficiency and maintaining consistent UI standards across **4+ betting platforms**.
- Integrated RESTful APIs for **leaderboards, loyalty, rewards, user accounts, and payment workflows**, handling asynchronous data using RxJS and reactive programming patterns.

- Led front-end development for **Leaderboards, Loyalty, and Payment features**, including integrations with **PayPal and Trustly**, contributing to a reported **40% improvement in core application performance**.
- Implemented Angular routing, route guards, HTTP interceptors, form validation, error handling, and service-based application architecture.
- Optimized Angular application performance through **lazy loading, component optimization, RxJS best practices, change-detection optimization, and efficient API usage**.
- Developed React features alongside Angular applications, using **React, TypeScript, hooks, reusable components, and REST APIs**.
- Built a reusable React component library with Tailwind CSS, reducing UI development time by **25%** and improving consistency across multiple platforms.
- Built cross-platform mobile applications using **Ionic, Angular, Capacitor, and Cordova** for iOS and Android.
- Integrated third-party payment and account services while handling API errors, loading states, validation, and secure client-side workflows.
- Investigated and resolved critical production issues across Angular and React applications, contributing to a **95% reduction in system downtime** through targeted debugging and hotfix deployments.
- Applied **TypeScript strict typing, reusable architecture, code reviews, and unit testing** to improve maintainability and reduce frontend defects by approximately **35%**.
- Collaborated closely with backend developers, UX/UI designers, QA engineers, and product stakeholders within **Agile/Scrum teams**.
- Participated in technical discussions, code reviews, sprint planning, debugging sessions, and production support.

UI/UX DEVELOPER — ANGULAR

NTT DATA | May 2021 – August 2021

- Developed and maintained enterprise applications using **Angular, TypeScript, HTML5, CSS3, and SCSS**.
- Modernized legacy application functionality by migrating and improving frontend components using Angular and TypeScript.
- Built reusable **Angular components, services, directives, and shared UI patterns** to improve consistency and reduce duplicated development effort.
- Integrated frontend applications with backend **REST APIs**, handling asynchronous operations and application state using RxJS.
- Implemented responsive UI layouts and reusable styling patterns for enterprise applications.
- Applied **TypeScript strict typing, component-driven architecture, and frontend development best practices** to improve code quality and maintainability.
- Implemented accessibility practices including **ARIA attributes, keyboard navigation, semantic HTML, and accessible UI components**.
- Identified and resolved frontend performance issues including unnecessary DOM updates and layout thrashing, improving application responsiveness.
- Collaborated with developers, designers, QA engineers, and business stakeholders to deliver features within Agile development cycles.
- Participated in code reviews, debugging, testing, and technical discussions related to frontend architecture and application performance.

EDUCATION

Post Graduate Diploma — Information Technology
Humber College, Toronto, ON | August 2020

Bachelor of Engineering — Information Technology
Gujarat University, Ahmedabad, India | July 2018
